ABOUT APX10

APX10 provides advanced data analytics through its proprietary platform - data|APX® - to facilitate the digital transformation of wastewater and water utility infrastructure and generate value out of existing data.

APX10 ensures utility management translate critical information into actionable insights for decision-makers aiming to expand efficiency, investment performance, reputation, and critical infrastructure services.

PROVEN SOLUTION FOR THE DIGITAL UTILITY

› 20% market share in an advanced Nordic market with mid-sized utilities

› Asset Performance Management made easy with affordable innovation, rapid integration, and continuous development

› Recognized domain experts in water utility-focused software

› Unmatched industry use-cases for reinvestment planning in budget-capped and strict regulatory environments

SMART SOFTWARE

› Plug-and-play data sourcing and capture that compiles all data and analysis in an intuitive SaaS platform

› Maximized value through costs savings, investment optimization and optimized digital workforce
