

DIGITAL WATER UTILITY TRANSFORMATION

data | APX[®] From data to decision

001011001110

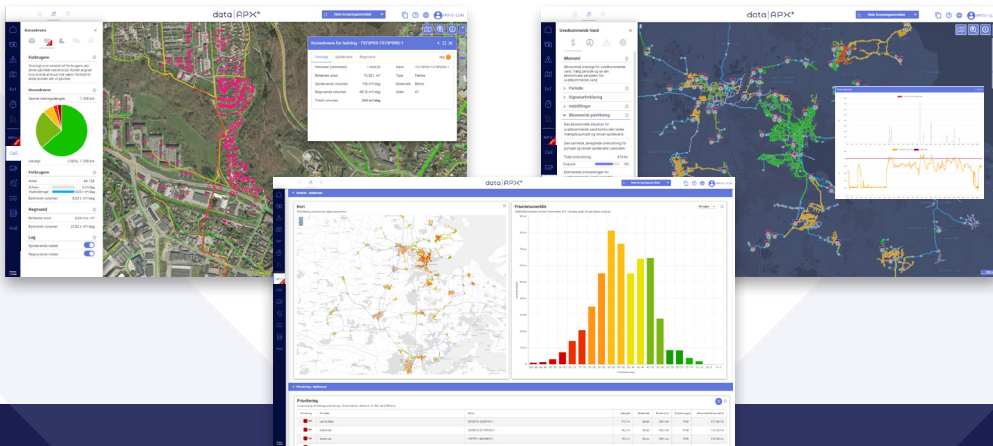

001011001110

DATA|APX[®] FEATURES

- › Data-driven overview of network performance – including financial and operational visualization
- › Cloud-based, subscription software solution built for automated deployment, security, and new feature upgrades
- › Single platform for all data management from any IoT device, SCADA system, smart meter, or public data source
- › Intuitive user-interface (UI) designed for ease-of-control, analysis, and planning, enabling data-driven decision making

DIGITAL ADVANTAGES

Proactive, dynamic, and actionable intelligence for **precision reinvestment priorities**

Eliminated data silos for straightforward Asset Performance Management for water utilities

Enhanced data insights to **reduce excessive expenditures** on CCTV inspection and other CAPEX/OPEX costs

Digitized manual processes to elevate operational efficiency and attract next-generation talent
